

Tushar Sadashiv Neje

Pune, India | 7028573950 | nejetushar07@gmail.com | [LinkedIn](#) | [Portfolio Website](#) | [GitHub](#)

SKILLS

Languages	Python, SQL, C/C++ (Basics), Java (Basics)
Frameworks	Django, FastAPI (Basics), Flask (Basics)
Databases	MySQL, PostgreSQL
Backend	REST APIs, Authentication (JWT/OAuth), API Integration
AI/ML	LLM Integration, Prompt Engineering, Computer Vision (Basics)
Tools	Git, GitHub, Docker (Basic), Postman
Concepts	Backend Development, Database Design, MVC Architecture

PROJECTS

ACADX – Enterprise Resource Planning System

Django, MySQL, ERP System

- Developed a Django-based ERP system with MySQL to manage attendance, academic records, and administrative workflows, including score management (MSBTE) and digital NOC processing
- Integrated AI-based reporting and export features with role-based modules to automate institutional operations and improve decision-making

Synedra AI

Python, Flask, LLM APIs, Multi-Agent System

- Built a multi-agent AI system using Python (Flask) and LLM APIs to generate and optimize marketing strategies through agent-based workflows for trend analysis, risk evaluation, and engagement optimization
- Built a structured agent interaction and feedback loop using engagement analytics to improve AI-generated strategies.

RespireX – AI-Powered Lung Disease Detection

Django, Deep Learning, Computer Vision, ML Integration

- Developed a Django-based platform for detecting lung diseases from chest X-ray images using deep learning models, enabling real-time prediction and result visualization
- Built an interactive dashboard for image upload, automated analysis, and basic diagnostic insights to support early detection

NyayaSearch – AI-Powered Legal Search Platform

Django, LLM, Search System, API Integration

- Developed a Django-based legal search system with keyword, court, and date-based filtering, integrating LLMs for context-aware and relevant search results
- Implemented a live legal news feed and structured search features to improve accessibility and real-time information retrieval

EXPERIENCE

Jun 2022 – Jul 2022

SVL Automations, Kolhapur

Full Stack Web Development Intern

- Developed and maintained web applications using PHP and MySQL

Jun 2025 – Mar 2026

The Tann Mann Foundation, Bangalore

Product Operations Volunteering

- Built dashboards and reports to track product metrics and support data-driven decision making
- Analyzed user feedback and optimized workflows to improve product features and overall execution

AWARDS & ACHIEVEMENTS

2024 Student of The Year (Best Outgoing Student)

DKTE's YCP, Ichalkaranji

2023 Secured 1st Rank in National & Inter-College Technical Competitions

JJMCOE, SIT, DKTE, Kolhapur

EDUCATION

2024–Present Bachelor of Technology (Final Year) Vishwakarma Institute of Information Technology, Pune

Pursuing a B.Tech in Computer Engineering at VIIT, Pune, with a current CGPA of 9.1

2021–2024 Diploma in Computer Science and Engineering DKTE's Yashwantrao Chavan Polytechnic, Ichalkaranji

Completed Diploma in Computer Science and Engineering with Aggregate of 94.00% (91.15 & 97.06)

RESEARCH & PUBLICATIONS

ACADX – Enterprise Resource Planning System

Published on IJIRCCE

Auto Sentinel –

Co-authored (Publication Pending)

- Developed a system for sensitive document detection using metadata analysis with driver behavior and facial emotions.

Acrobatic Spider Robot

(Patent in Process)

- Developed prototype of an IoT robot for video streaming, location tracking, and remote monitoring in hazardous environments.

Secure Data Wiping

(Patent in Process)

- A secure data wiping system ensuring safe, verifiable data erasure for trustworthy IT asset recycling and e-waste management.

CERTIFICATIONS

- NPTEL – Python for Data Science (IIT Madras), Ethical Hacking (IIT Kharagpur), Systems and Usable Security (IIT Indore)
- SAP Technology Consultant (Coursera)
